KIWANIS BULLETIN
NOVEMBER 13, 1979

Program Notes:

Our program this week will feature the installation of the incoming officers of the Key Club. John Uboldi, the Key Club coordinator, will be program chairman.

Last weeks speaker, Cy Radcliffe of Boise Idaho was outstanding. His talk on cryptography in general, between WWI and WWII gave a lot of historical background; his story of how both the German and Japanese Codes were illuminating. As he said, probably the one most important thing that saved more lives and permitted the Allies to successfully fight WWII were solving these two codes. In passing he also noted that many important people knew that war was imminent. Did you know that "Cryptography" is from the Greek meaning Secret Writing?

"WE BUILD!"

KIWANIS BULLETIN
November 27, 1979

Program Notes:

Don Anderson, program chairman for this week, has announced that we will hear "Trends in Travel," presented by John Lloyd, AMTRAK, PAN AMERICAN, and Scott Singley, SITMAR Cruiser.

Last week, designated Farmer/City week, Harry McCracken, Sonoma County Agricultural Commissioner, talked on the use of pesticides and the problems associated with their control. He lead off by stating tha California is the only State to have Agricultural Commissioners and their duties are many: primarily regulatory, but also responsible for inspection of plants and animals and the conduct of surveys of diseases and pests to eradicate them before they become a problem. He pointed out that there is more and more demand by various groups and the State to rigidly control the use of pesticides, in spite of the few cases reported where people may have been exposed. Proposed regulations could make approval of permits a long-drawn-out process, which could only make life more difficult and more expensive for the farmer.
